

available other than the proposed ocean disposal site. If there are other feasible alternative methods or sites available, the district engineer will evaluate the engineering and economic feasibility and environmental acceptability of the alternative sites.

(ii) If the district engineer makes a determination that there is no economically feasible alternative method or site available, he will so advise the regional administrator of his intent to proceed with the proposed action setting forth his reasons for such determination.

(iii) If the regional administrator advises, within 15 days of the notice of the intent to issue, that he will commence procedures specified by section 103(c) of the ODA to prohibit use of a proposed disposal site, the case will be forwarded through the respective Division office and CECW-D to the Secretary of the Army or his designee for further coordination with the Administrator of EPA and final resolution. The report forwarding the case should be in the format described in §337.8 of this chapter.

(iv) The Secretary of the Army or his designee will evaluate the proposed project and make a final determination on the proposed disposal. If the decision of the Secretary of the Army or his designee is that ocean disposal at the proposed site is required because of the unavailability of economically feasible alternatives, he will seek a waiver from the Administrator, EPA, of the criteria or of the critical site designation in accordance with section 103(d) of the ODA.

PART 337—PRACTICE AND PROCEDURE

Sec.

337.0 Purpose.

337.1 Public notice.

337.2 State requirements.

337.3 Transfer of the section 404 program to the States.

337.4 Memoranda of Agreement (MOA).

337.5 General authorizations.

337.6 Statement of Findings (SOF).

337.7 Emergency actions.

337.8 Reports to higher echelons.

337.9 Identification and use of disposal areas.

337.10 Supervision of Federal projects.

AUTHORITY: 33 U.S.C. 1344; 33 U.S.C. 1413.

SOURCE: 53 FR 14916, Apr. 26, 1988, unless otherwise noted.

§337.0 Purpose.

The practices and procedures part of this regulation apply to all Corps operations and maintenance activities involving the discharge of dredged or fill material in waters of the U.S. and ocean waters and related activities of local interests accomplished to ensure continued functions of constructed Corps projects.

§337.1 Public notice.

Presently, public notification of proposed discharges of dredged or fill material is required by the provisions of section 103 of the ODA and sections 401 and 404 of the CWA. District engineers are encouraged to develop procedures to avoid unnecessary duplication of state agency procedures. Joint public notification procedures should be a primary factor in the development of Memoranda of Agreement with the states as described in §337.4.

(a) With the possible exception of emergency actions as discussed in §337.7, the district engineer should issue a public notice for projects involving the discharge of dredged or fill material into waters of the U.S. or ocean waters unless the project is authorized by a general permit. Public notices for Corps operation and maintenance activities are normally issued for an indefinite period of time and are not reissued unless changes in the disposal plan warrant re-evaluation under section 404 of the CWA or section 103 of the ODA. The public notice is the primary method of advising all interested parties of Federal projects and of soliciting comments and information necessary to evaluate the probable impact of the discharge of dredged or fill material into waters of the U.S. or ocean waters. The notice should, therefore, include sufficient information to provide a clear understanding of the nature of the activity and related activities of local interests in order to generate meaningful comments. A single public notice may be used for more than one project in appropriate cases. The notice normally should include the following items:
